I. Company Overview

Around 1 in 6 people living in Africa suffer protein deficiency in their diet, BYPORK(registered under JEJGREEN FARM ENTERPRISES, BN 2830199) is an initiative to combat protein deficiency in Africa by pooling resources from Africans to farm pigs and giving back 10% of every investment on our platform to the less/under privileged in our community. Pigs are rich in protein and offer probably the best business option of all the protein sources given that nearly 80% of the \$3B pork consumed in West Africa annually is imported.

II. THE TEAM

Our team is a young and dynamic team with diverse background and experience in Engineering, Law, Agriculture and Business. Some of the key founders include;

Patience Dogo
CTO

Emeka Jeremiah
CEO

Ekene Ohabughiro
CGO

III. SCOPE OF WORK

In a broad sense, we are a pig investment platform seeking to combat protein deficiency. People invest to farm pigs and we do ALL the work; buy, raise, feed, insure and sell the pigs. After the investment period, we pay investors' money plus interest. 10% is then gifted to the less privileged in our community.

IV. OUR BUSINESS MODEL

We have a simple 4 step model;

- WE BUILD: We create an online platform where people farm pigs.
- WE FARM: Buy, feed, nurture, insure and sell the pigs.
- WE PAY: We pay investors their investments + interest.
- WE GIFT: We gift 10% of every investment on our platform to the less/under privileged in our community.

V. WHY PIG FARMING

Pork is the most commonly consumed meat in the world, \$3billion dollars of which is consumed in West Africa annually. Around 80% of that value is imported. Other key reasons are:

- To localize revenue generated from pig farming and it's processing.
- Pig farming is the most profitable part of livestock farming.
- Pigs have the highest feed to meat ratio of any livestock.
- Because pigs are prolific and resilient with the lowest livestock mortality rate.

VI. FAQs

1. How Safe is my investment?

We would say more than 100% percent but that'd be a little low. Firstly, BYPORK is a duly registered company with the Nigerian CAC, meaning we have a reputation to protect and you can prosecute us if we fail to pay up. Also, our team has many years of experience farming and selling pigs to tell you that your investment will yield its return in due season.

2. Is there a legal backing for me?

Yes. After signing up for any plan, a memorandum of understanding (MOU) is prepared by our lawyer and sent to you via email.

3. Are the pigs insured?

Once new animals enter the farm, we insure them with our insurance partners: Leadway assurance.

4. Can investors visit the farm?

You're absolutely welcome. Just give us a call for directions or use the address at the top of this document.

5. How will my money be paid?

By the end of the farming season, your money (investment + Interest) is paid into the account details you provided.

6. Can I receive my payment in a different account from the one I signed up with?

Yes, just contact us close to your pay out period to correct your details.

7. Can I invest again, while I have a plan running?

Yes.

8. Do I earn money for referring people?

Yes. Once you refer someone who invests in our farm, you'd be paid 5% of their investment. Cool right?

For any more questions, please contact us.

VII. MEMORANDUM OF UNDERSTANDING (MoU)

The MoU outlines the legal and factual premises for your partnership (as an investor) with BYPORK. After investing, it is sent by legal partner directly to your email. You are advised to read thoroughly or better yet engage the services of a legal entity.

VIII. INVESTMENT PLANS

PLAN	INVESTMENT RANGE	PERCENTAGE ROI (%)
BRONZE	N100,000-N299,999	25
SILVER	N300,000-N599,999	30
GOLD	N600,000-N2,000,000	35

*The duration of every investment is 10 months.

*10% of every investment goes to the poor in our community.

IX. SPECIAL PLANS

Two or three times a year, we may announce special plans, different from our standard plans and rates. You are advised to look at for those opportunities to maximize your investments as they are using higher in returns than regular plans.
